TECH STACK

- Java
- Python
- C++
- JavaScript
- SQL
- React.js
- Flask
- Firebase
- Tailwind CSS
- Machine Learning
- DSA
- Git & GitHub

Lavanya

TYAGI

JAVA BACKEND DEVELOPER
AI/ML ENTHUSIAST

FEATURED PROJECTS

AI MUSIC RECOMMENDATION SYSTEM

Python • Flask • Machine Learning

Built AI-powered music recommendation system using Flask and ML.

- Developed personalized recommendation logic using dataset filtering.
- Designed modular backend APIs for scalable recommendations.

SMART CITY EMERGENCY SYSTEM

C++ • Graphs • DSU • Optimization

- Developed smart-city emergency routing optimization system.
- Applied graph algorithms and DSU for efficient path optimization.
- Implemented real-world emergency response simulation concepts.

SMART DELIVERY OPTIMIZATION SYSTEM

React.js • Node.js • Optimization

- Designed delivery optimization platform focused on route efficiency.
- Developed responsive dashboard-based frontend architecture.
- Worked on scalable logistics and optimization workflows.

REAL TIME CHAT APPLICATION

React.js • Firebase • Real-Time Database

- Built real-time messaging platform with authentication support and Integrated Firebase
- Developed responsive frontend with modern UI interactions.

EDUCATION

BACHELOR OF TECHNOLOGY (B.TECH)
COMPUTER SCIENCE ENGINEERING

JAYPEE INSTITUTE OF INFORMATION
TECHNOLOGY
2024 – 2028

CLASS 12TH: 97%

CLASS 10TH: 98%
